**Name of Offeror or Contractor:**

SECTION A - SUPPLEMENTAL INFORMATION  
\fpqr\NSN(s): 1310-01-342-6874, 1315-01-050-8883, 1315-01-290-4748  
Item(s): M702 Ignition Cartridge, M299 Ignition Cartridge, M752A1 Ignition Cartridge

The purpose of this amendment is as follows:

1. To provide correct versions of the DTLs incorporated in Amendment 0006. The change in these DTLs are in paragraphs 4.5.5 and 4.5.6 regarding the type of ammo to be used for Ballistic Acceptance Testing. The DTLs will be provided as Attachment 029 (M702 DTL 9280553), 030 (M299 DTL 9293422), and 031 (M752A1 DTL 9294752).

2. To provide the following clarifications:

- a. Reference Attachments 026 (M702 DTL 9280553), 027 (M299 DTL 9293422), 028 (M752A1 DTL 9294752); Paragraphs 4.5.4.1.1 and 4.5.4.1.2:

The rationale supporting these two paragraphs is to have the propellant load checked by itself and also to confirm this load weight in the assembly by subtracting out the metal parts/paper tube weight.

4.5.4.1.1 - This paragraph states that the propellant load itself is to be weighed in a separate container and then checked 100%. The check comes in paragraph 4.5.4.1.2.

4.5.4.1.2 - This paragraph states that the propellant weight should be calculated by weighing the assembly before and after loading with the propellant, then subtracting to get the propellant weight.

Essentially 4.5.4.1.2 double checked the weight determined by 4.5.4.1.1.

\*Notice to all offerors: The aforementioned paragraphs are still labeled with the same number in the current version of the DTLs incorporated in this amendment.

- b. Reference Amendment 0003, page 4. "History and Government approval status if applicable" means that if the equipment was ever submitted and approved by the Government for use on a contract that information should be submitted in the offerors proposal.
- c. Reference Solicitation, Section M, page 68, Acceptance Inspection Equipment. This section of the solicitation merely discusses how the Government plans to evaluate the offerors based solely upon what is submitted in their individual proposal. AIE equipment designs, test procedures, calibration procedures and inspection procedures submitted in the proposed AIE plan will be judged solely on the basis of adequateness and appropriateness for each offeror and not across the offerors.
- d. The AIE program plan should describe in as much detail as possible how the contractor plans on going about performing all inspections required by the specifications and drawings. This program plan should not be limited to inspection equipment, but should also address production cycle times, inspection procedures, maintenance procedures and calibration procedures as applicable.

All other terms and conditions of this solicitation remain unchanged.

\*\*\* END OF NARRATIVE A 0009 \*\*\*
